DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 2, 4-19 and 21-37 are allowed.

The following is an examiner's statement of reasons for allowance:

In reference to claim 1, the prior art of record does not explicitly disclose projecting a principal image without a portion of the principal image corresponding to a calibration area and projecting a calibration image onto the calibration area while projecting the principal image without the portion, in combination with the further limitations as applied to claim 1 above.

In reference to claims 2 and 4-19, claims 2 and 4-19 depend upon allowable claim 1 and are therefore also deemed allowable.

In reference to claim 23, the prior art of record does not explicitly disclose the display device specifically as configured and explicitly the display device comprising a light engine apparatus which is further comprised of a light engine configured to project a principal image and a calibration light unit configured to project an intended calibration image, in combination with the further limitations of claim 23.

In reference to claims 21, 22, and 24-37, claims 21, 22 and 24-37 depend upon allowable claim 23 and are therefore also deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

2. The cancellation of claims 3, 20 and 38-41 is noted.
3. Applicant's arguments, see page 11 of Applicant's Remarks, filed 12/06/2006, with respect to rejection of claims 20-22 have been fully considered and are persuasive. The prior art rejection of claims 20-22 has been withdrawn and the claim are now allowable since objected to subject matter from claims 23-37 have been rewritten in independent form.

References Cited

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
 - a. Raskar et al. (U.S. Patent 6,384,965)
 - Raskar et al. discloses a self-configurable projector cluster which includes projectors comprising of projection and camera devices housed in one housing.
 - b. Raskar et al. (U.S. Patent 6,677,956)
 - Raskar et al. discloses a computer implemented method for cross fading pixel intensities of overlapping images produced by projection systems.
